UCLA Institute for Technology, Law & Policy

ABOUT US

The **UCLA Institute for Technology, Law & Policy** (ITLP) drives research and analysis of new and emerging technologies to ensure they are developed, implemented and regulated in socially beneficial, equitable, and accountable ways.

Our research, work and members represent **"policy at the speed of tech"** — with focus on A.I., content moderation, intellectual property, privacy regulation, quantum computing and much more.

Together, we form an influential hub that interconnects academic excellence with cutting-edge practice across the legal, tech, philanthropic and government sectors.

Here's a look at some of what we offer:

FAST FACTS

FOUNDED IN 2020 as a collaboration between the UCLA School of Law and the Samueli School of Engineering.

LED BY Executive Director Michael Karanicolas and Faculty Co-directors Mark McKenna and John Villasenor, with many affiliated faculty across the Law and Engineering Schools.

AT THE VANGUARD of the intersection of technology and law — UCLA ITLP offers
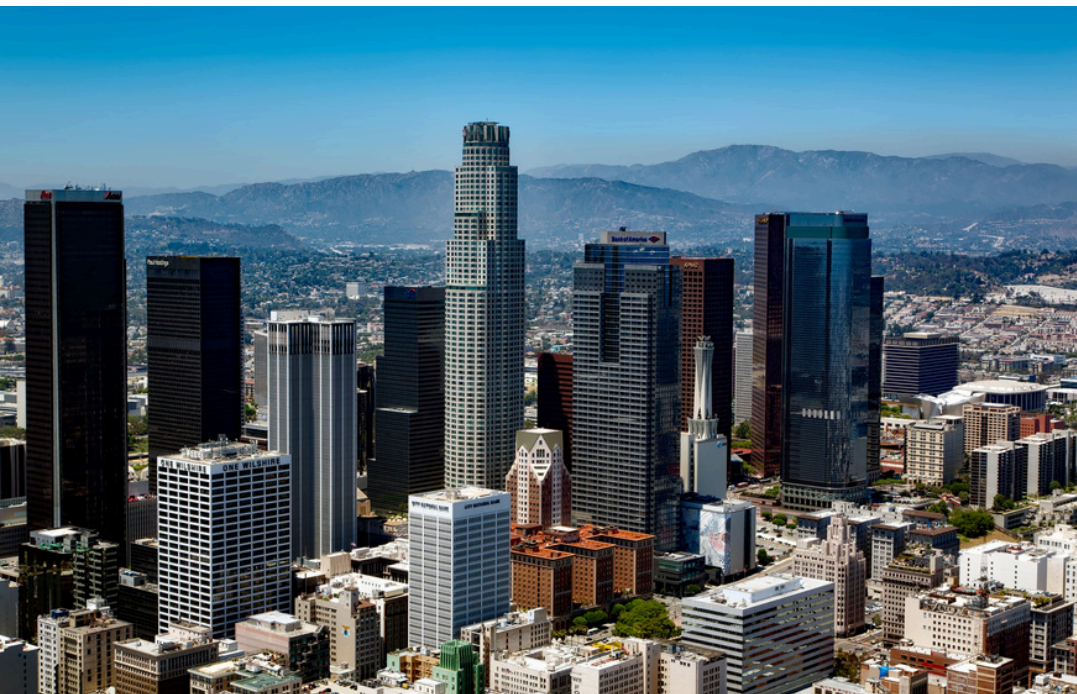

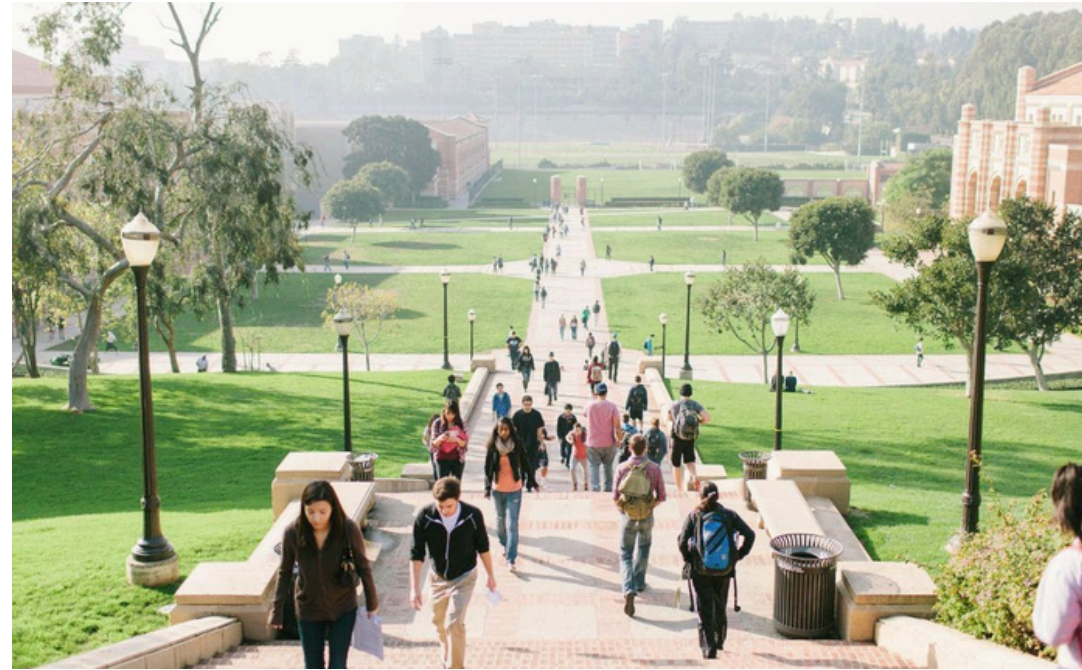

- Innovative curricula at a top-ranked law school
- A multidisciplinary approach and community
- Focus on the next generation of legal experts, technologists, consumers and educators.

CONTACT US

PRACTITIONERS & POLICYMAKERS

- Lend and expand private- and public sector insight to today's policy questions

- Participate in a hub that includes federal, state and local policymakers across the administrative state

- Meet the next generation of professionals in the field

SCHOLARS & STUDENTS

- The latest in legal education: an experiential **Information Policy Lab**, UCLA School of Law's **Technology Law specialization** and **Ethics for Computer Scientists** – a first-of-its kind course to be offered at Samueli School of Engineering

- Career and professional development: plan and lead workshops, develop policy publications, and contribute to amicus curiae briefs on pressing technology policy questions

- Events: an annual Careers in Tech week, frequent on-campus discussions and symposia on the issues

ITLP POLICY FELLOWS
examine the ethics and social impact challenges associated with new technologies, privacy and data protection. They conduct research, write, teach and engage students, as well as participate in Institute conferences, workshops and funding proposals.

ALUMNI & AFFILIATES

- Quarterly/Recurring social-professional events

- A current and dynamic community of practitioners

- Insight from leading scholars and policymakers

- Professional visibility / development

THE FUTURE IS YOU.

Be part of a robust and committed core of UCLA alumni and active network of attorneys, technologists, policymakers and scholars who enjoy social-professional events and membership in a dynamic community.

You can help solidify ITLP's foundation and future. Join us and support our goals:

1) Elevate multidisciplinary inquiry and research.

2) Foster the next generation of scholars and policymakers.

3) Support experts at the vanguard of the intersection of technology and law.

THANK YOU FOR YOUR SUPPORT
